PROFILE

Professional open to new experiences and challenges, motivated by learning and contributing with her knowledge. Inspired by the creation of digital products not only from the technical development but from a user and design focus. Always looking to understand the user's real need to develop products with great impact and usability.

EXPERIENCE

Willis Towers Watson - Mexico City, México, 2014-2017

Investment Analyst

Improvements to the information requesting process were implemented by creating a database. Using the database, information request duplicities were identified and removed, this decreased the workload, encouraged teamwork and allowed the area to become more efficient.

Also, the quarterly reports delivery time was shortened, through a continuous organization, constant monitoring, and good communication, the reports were delivered up to a week in advance. This generated a positive impact on the area's quality service and attracted more customers.

Mexipass de México, Mexico City, México, 2014

Insurance Agent

Involved in the establishment process of the company in Mexico, as part of the role the processes that a company needs in order to be able to operate, such as, administrative, accounting, negotiation and customer service were actively learned.

EDUCATION

Laboratoria - Santiago, Chile, 2019

Front End Developer Bootcamp

Through an agile methodology, the development of web products focused on the user was learned, a self-learning ability was also developed.

Taller Fashion Development Project -Mexico City, México, 2016

Introduction to the direction of fashion enterprises

General business knowledge, as well as the necessary skills to run a company in this field, was acquired.

UNAM- Mexico City, México, 2014

Certified course on Business Administration

The detection of business opportunities was learned, decision making, negotiation, and communication skills were improved.

UNAM - Mexico City, México, 2014

Bachelor's Degree in Actuarial Science

Analytical reasoning through the creative application of mathematical principles with a focus on risk management was acquired.
